Subject: Tower Standard - Access to Kozak Property

Kristen,

I will be unable to discuss access with you later today. I have followed up with a conversation with the Kozaks and they reminded me of a letter sent to you on September 28, 2016 regarding access to their property. The letter was pretty specific in its desire to have adequate notification, detailed documentation of the reason for requesting access to their property and date(s) that access is requested. Additionally they are also requesting hold harmless indemnification assurances that their property be returned to pre-entry condition and a representative protecting the interests of the Kozaks be onsite to accompany those accessing their property. Once all these

requirements are met, they are willing to sign an access agreement specific to the approved work.

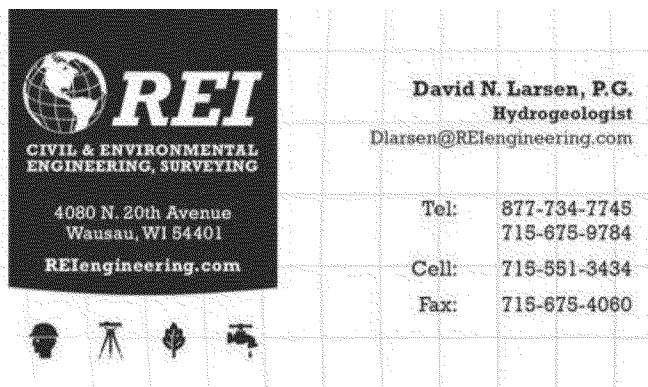

REI had also requested more detail regarding to the proposed scope of services. Specifically, REI had requested work plans, methods and procedures and timelines to access to the collected data. Will any waste be generated during this scope of services? If so, the Kozaks do not want the waste stored on their property. This is an issue as previous work resulted in waste being stored on Kozak property without their permission. REI also noted that three (3) padlocks were reported as missing on PECFA funded monitoring wells on March 1, 2017. The locks appear to have gone missing after the July 20, 2016 sampling event conducted by REI.

I will be out of the office tomorrow morning and should be back in about 1:00. I will make myself available to assist in completing the access agreement with the Kozaks if necessary.

Thank you,

David N. Larsen P.G

Hydrogeologist / Professional Geologist
